Subject: 2,4-D comments

Jim

I talked to Dan Kenny this pm; the comment period on 2,4-D did close on 30th, as I indicated in the management meeting this afternoon. Dan did not receive the entire compilation of the comments; however he indicated they ranged anywhere between 2700 to 27000 (apparently each signature on the letter-writing campaign was considered a comment; hopefully he is right on this). The feeling I got from him was that was that most of the comments are nothing new and pertained to objections to biotech crops and the use of 2,4-D on a large scale. I will keep you posted as I hear more.
